

Motor Maintenance – Application Guide for Outboard Products

A – Spray Mercury Power Tune into carburetor to rid engine of carbon deposits.

B – Fog internal components with Mercury Storage Seal Rust Inhibitor to protect from corrosion during storage.

C – Spray Mercury Corrosion Guard on external electrical connections and painted surfaces to protect from corrosion.

D – Use Mercury Power Trim and Steering Fluid to top off reservoirs and pumps.

E – Use Mercury 2-4-C with Teflon or Special Lube 101 on tilt tube, drive shaft splines, swivel pin, or on throttle linkages. On prop shaft also use Mercury Anti-corrosion Grease.

F – Use Mercury Premium Gear Lube in the gear case.

L – Use Mercury Spray and Touch-Up Paint on external metal surface nicks and scratches to protect from corrosion.

M – Replace damaged propellers with Mercury Marine EDP finished aluminum or Mercury Marine Stainless steel propellers.

N – Use Mercury trim tabs and anodes for greater protection from galvanic corrosion.
